About Cisco Entertainment accounts This document describes the steps necessary for a successful implementation of Cisco Jabber for Android with basic functions . tuse@testlab.com). This can be caused by moving to the bottom of the directory number configuration and Associated End Users. Always use Primary Line Default In the drop-down box select (Off, On, or Default). A Default Cisco Unified Communications ManagerA uses the Always Use Prime Line service meter configuration³ which supports the Cisco CallManager Always use Prime Line service for voice messages Default S A De De drop-down list box select (Off, On or Default). A Default - Cisco Unified CM uses the configuration from the Always Use Prime Line for Voice Message service parameter, which supports the Cisco CallManager service. Majority of required fields have default configurations and don't need to manuallyA configuredA unless otherwise requiredA for your deployment. Cisco Unity Connection (CUXN) versionA 10.5 or higher. A Jabber for Android 12.1 or higher. Certificate Operation No Pending OperationA YES This field is related toA CAPF enrollment. A DND Option Call Reject YES When you enable DND on the phone, this parameter allows you to specify how the DND features handle incoming calls. If the phone does not support security, choose a nonsecure profile. Line configuration is a standard configurationA that must be performed for all phones and is not a configuration that is specific to BOT devices. A Tip: A Once you haveA configuring aA directory numberA your BOT device make sure to associate the CUCM end user to the directoryA number. This is aA quick start guide and will not cover any of the advanced features supportedA by Cisco Jabber for Android. A Prerequisites Cisco recommendsA you have a basic understanding of the Cisco Unified Communications Manager (CUCM) administration web pageA as well as experienceA with basic phone configurations. A Software Requirements This guide assumesA the following softwareA versions are in use: A Cisco Unified Communications Manager (CUCM) version 10.5(2) or higher. From here you can search for the CUCM end users devices. Tip: A Cisco recommendsA that all Cisco Dual Mode for AndroidA devices be configured with a device name prefix of BOT. A For example, you provision a user named Holly Day with aA BOT device. In cases where mailboxesA are not LDAP integrated please refer to the Cisco On-Premises DeploymentA Guide.
